Safety and Security Window Films

Crucial Window Safety for Hurricanes and Natural Disasters

Windows are your home's most vulnerable area. Once broken during a hurricane, high winds or violent storm, you can experience severe property damage.

Solar Gard® Armorcoat® safety window film helps hold broken

glass in place upon storm debris impact, even enduring the heavy wind and rain that can last for hours. Once your home is unsecured, anyone or anything inside your home can fall victim to harsh weather and damage resulting from exposure.

Solar Gard Armorcoat also protects people and furnishings from the dangerous airborne shards that cause a majority of injury and damage during and after the storm.

Solar Gard Armorcoat safety film is an optically clear, polyester glass coating, unlike plywood and other window coverings that block your view. You don't have to be home to tape or board your windows in preparation for rough weather or other acts of nature. Solar Gard offers passive, 24/7 window safety and protection as it is professionally installed without drilling or special storage requirements.

Solar Gard Armorcoat stays on the glass year after year with complete view intact, offering the following benefits:

- Passive window protection 24/7
- Helps hold dangerous shards intact
- Maintains clear view through glass
- Requires no drilling or storage
- Professionally installed
- Available clear and with solar protection

Windows destroyed by hurricane-force winds or flying debris put your home – and family – in jeopardy. Solar Gard Armorcoat window film holds windows firmly in place even after they're broken, to protect your family from flying glass shards and prevent wind-driven rain from damaging your home's interior.

Solar Gard Armorcoat safety film meets some of the most stringent building codes in the industry, such as Miami-Dade Protocol & Southern Building Code Congress International. For optimum shattered glass retention and hurricane window protection, ask your dealer about frame anchoring options.

Solar Gard Armorcoat safety films

Solar Gard Armorcoat safety window films come in two types to offer you the type of protection you need.

Clear safety film

Optically clear Solar Gard Armorcoat safety films are colorless and undetectable on glass, which makes them the perfect protection retrofit. Unlike many other films, Armorcoat clear safety films are non-reflective so it is virtually invisible on your windows. You maintain the natural appearance of your windows day or night. There is no mirror effect or detectable change to the glass surface, so your windows look clear, bright and beautiful.

Solar protection safety film

Solar Gard Armorcoat's solar control safety films are tinted to provide additional sun related benefits beyond ultraviolet protection. These films include a metallized layer of polyester, with durable, exotic metals for exceptional, solar control performance capabilities and color. In addition to glass retention, they offer privacy, balance temperatures, minimize eye-straining glare, and help preserve furnishings and merchandise. Protect your occupants and property while keeping them cool and comfortable, plus yield significant energy savings with Solar Gard Armorcoat.

Call 877 273-4364 or visit www.solargard.com to get Solar Gard Armorcoat 24/7 hurricane protection.

The immense windows of this home in Florida were retrofitted with Armorcoat solar safety film for protection from broken glass and hurricane season preparation.
