

» FREQUENTLY ASKED QUESTIONS

Will Clearshield really stop rocks from chipping the front of my car?

Yes. The material that it is made from was originally designed to protect the leading edges of aircraft propellers and rotor blades from rock chips. It is a much easier task to protect your vehicles paint than it is to protect an aircraft propeller moving at nearly the speed of sound.

Can I see a line where Clearshield stops?

A line is slightly visible where the film stops, but the three alternatives to that line are a bug shield, a car bra or rock chips, all of which will be more visible than the paint protection film.

How hard is it to see on the car after it is applied?

The material is about 99.5% clear. On any color darker than stark white, you can't see the film. On a stark white car, you can see that .5% of color, but it is "invisible" at a short distance.

How long will it last? When will I have to replace the kit?

Our product is warranted for 5 years.

How is Clearshield applied?

Our ComputerCut® machine cuts the plastic into shapes designed to fit various parts of your car. These pieces are then applied to the vehicle in a very similar fashion to that of window tint. The Clearshield pieces and the painted surface are then wet with a solution and the film is moved into the precise location it is supposed to be. Then the extra solution is squeegeed away as the film dries it adheres to the car.

Will my paint fade differently under the shield than it does on the rest of the car?

No. The material does contain an inhibitor to prevent the plastic from reacting to the sun's UV rays, but this does not prevent the UV rays from passing through the plastic into your paint.

Can Clearshield be removed?

Yes. It can be removed easily and will not damage the paint. To remove the film, you must heat the Clearshield on your car to approximately 150° using a heat gun or a hair dryer. Start in a corner and gently work the film with your finger. Once you have enough of the material free from the surface to hold on to, slowly pull the film from the paint working just behind the heat source. The film will easily release from the paint and will not leave a residue.

PAINT PROTECTION FILM

» Clear protection for your
automotive investment

Clearshield paint protection film

The Solar Gard® Clearshield system is the most advanced development in protection for automotive paint finishes. This nearly undetectable protective film is your best defense against the everyday road debris that can damage or destroy your vehicle's painted surfaces. Clearshield protects your passenger car, show car, truck, van or sport utility whether it is old, new, big or small.

With Clearshield paint protection film, the most vulnerable areas of your vehicle have an extra measure of protection from:

- Insect stains and abrasions
- Scratches and nicks
- Small road debris damage
- Winter road salt and sand

The Clearshield process:

- 1 ComputerCut® patterns (Clearshield pattern components may vary by vehicle type. Ask your dealer for details.)

- 2 Professionally installed

- 3 Virtually invisible protection

Clearshield film is unlike any other method used to protect paint finishes:

- **It's practically invisible**
Clearshield is a clear, protective film, so it won't change the appearance of your vehicle and it won't harm your paint.
- **It's durable, dependable and guaranteed**
Clearshield is a thick, durable urethane film designed to withstand solar energy, high temperatures and resist impact. It also comes with a 5-year limited warranty.

- **It's customized to fit your vehicle**
Clearshield is pre-cut according to vehicle make, model and year - so it isn't necessary to cut or trim on the vehicle itself. Clearshield won't compromise vehicle surfaces; it is applied without any holes or fasteners. It protects hoods, bumpers and mirrors. And, Clearshield also works great on boats and RVs.

To see our inventory of available Clearshield patterns, visit our website at www.clearshield.com.

- **It's installed by qualified professionals**
Clearshield dealers are professionals experienced in the proper preparation, installation and care of the product.
- **It fits like a glove**
Clearshield is a protective film that won't compromise vehicle surfaces; it is applied without drilled holes or fasteners.
- **It won't harm paint finish**
Clearshield is unlike vehicle bras, which are cumbersome, dramatically alter vehicle appearance and cause paint chaffing.

Clearshield protects the most vulnerable areas of your vehicle

- **It doesn't require special maintenance**
Simply clean, wash and wax your vehicle the way you always have. Clearshield will take care of the rest.

Clearshield's performance is guaranteed with a 5-year limited manufacturer's warranty that the film:

- Won't crack, peel or bubble
- Won't discolor or turn yellow
- Will stay put
- Will remain optically clear

To maintain the paint finish of your vehicle, Clearshield paint protection is the clear choice. Talk to your Solar Gard Clearshield dealer today.
